

CALL FOR VISITING STUDENTS

When:

12-month stay beginning
January 1st, 2023

Where:

Colorado School of Mines
(Golden, Colorado)

Funding:

Graduate student salary
(\$32K), travel, health
insurance

Topic: Experimental material science: thermoelectrics and batteries

Description: Student's activities will focus primarily on synthesis, structural investigation and high temperature transport measurements. Scientific results of the visit can be used for preparation of the diploma thesis; the offer is addressed to both Master and Bachelor students. During the stay it will be possible to take a course in Solid State Physics. Successful visiting students will be invited to continue research as PhD candidates in our group. Visa regulations and finding room to rent can be assisted by Polish post-doc working in our team.
